

## Homework Exercise 1 (HW1)

The goal of this assignment is to **give you experience in designing web portfolio and acquiring fundamentals of Python in the context of data analytics.**

1. Create your personal web page by using **GitHub**. Your personal web page should contain your name & photo (professional attire is must), brief description about you (short bio), and a **<Resume link>** of your PDF resume/CV [40 points].
  - You can use any free open-source web development/theme tools ([Jekyll theme](#), [Kompozer](#), [WordPress](#) for example) to create your main webpage /web portfolio. Use GitHub to host your pages (**<Your GitHubuser name.github.io>**).
  - Refer the [YouTube video](#) that explains how to proceed with it.
  - It should be noted, your page **url** should be “**yourGithubUserName.github.io**” and pay attention to this step, when creating your **.io** page.
  - Don’t create something like **YourGithubUserName.github.io/MyWebPage/index.html**
2. Install required Python’s IDE /work environment. Then submit the **PDF version** of the document (see the template given below inside box) with your response including your full name, UIN, and followed by tick mark at one of the given options. Refer submission procedures at the end of page [40 points].

---

Name: Jose Luis Delgado II

UIN: 01334224

\_\_\_\_\_ I certify that I have installed Anaconda or similar python’s IDE/work environment and practiced examples and activities given at [Supplemental Module \(Python\)](#) in course Canvas.

***JLD*** I already know python. Therefore, I choose not to do this exercise. I understand that it is my own decision, and I am responsible for all consequences.

- 
3. Download a **course syllabus** given in the course Canvas. Read and understand the syllabus. Once you complete reading, enter your name, UIN, and sign it with date at given sign space in the last page of the syllabus (your copy) for submission [20 points].

## What to submit?

- Submit the URL of your created webpage to **HW1 in Piazza**. Your web main page should also contain **<Resume link>** of your PDF resume/CV. Refer task 1 for more info.

- Combine your answer files (PDF version) of tasks 2 and 3 as **one PDF file** and name it as **<yourlastname-HW1.pdf>**. Then submit it at course canvas' HW1 submission page.
